

Date:

Wednesday Challenge Form

Group Members: AJ, Demetrie, me,

Problem Statement: Try to find the sphere force
Of an adhesive.

Approach: We used apoxy and it took a little
While to dry about 30 minutes. So after we
Finished and then we sat there and talked the
Whole time until it dried. After we tested it
We held onto the 2 jugs so we passed.

Solution: there was no challenge because it
Take 2,500 psi to break the gap

Lessons Learned:
